ABOUT ME

Good day, I'm a self-taught junior web developer. The passion for gaming and curiosity in technologies sparked my interest and set myself in the coding journey, and the hunger for knowledge in programming had kept me motivated to learn more about software development.

I had more than 13 years of working experience in engineering fields such as manufacturing & other relevant engineering companies, the past experience has helped me develop soft skills in problem-solving, analysis & researching and might aids me in my future career in software development.

The coding experience has helped me develop my mind to think & constant self-improvement, also having the ability to see a problem from one angle, then being able to take a step back and look at the same problem from an alternative perspective, it's fun & challenging and I enjoy coding so much.

WORK EXPERIENCES

2008 AUG - 2010 JAN

PROFESSIONAL TOOLS & DIES SDN BHD
JUNIOR MOLD DESIGNER

- PLASTIC MOLD & STAMPING MOLD DESIGN
- FABRICATE JIG & FIXTURES FOR PROCESS IMPROVEMENT.
